Enterprise System Engineer – Junior Level

Description

Key Requirements:

The ideal candidate must possess the following:

- ☑ Graduation from an accredited college or university with an associates degree in computer science or a related field, plus two years of experience in enterprise system implementations, operations, and maintenance.
- ☑ Two years experience with implementation and integration of commercial off-the-shelf (COTS) software into existing architectures. Customer service and support experience preferred.
- ☑ Other combinations of applicable education, training, and experience that provide the knowledge, abilities, and skills necessary to perform effectively in the position may be considered.

Responsibilities

- ☑ Install, configure, and maintain Windows Servers that deliver services for the organizations environment. Work closely with vendors to identify performance issues and schedule updates and patches.
 - ☑ Develop and implement scripts and utilities to automate system and application administration and maintenance tasks.
 - ☑ Support the process of maintaining appropriate operating system software levels to ensure a secure and stable environment.
 - ☑ Participate in architectural and design decisions.
 - ☑ Participate in disaster recovery and business continuity planning and implementation.
 - ☑ Works on multiple project requests. Engage vendors of applications and systems to assist with best practice implementations and troubleshooting.
 - ☑ Participate in establishing effective and efficient governance policies to aid in the management and effectiveness of the service.
 - ☑ Coordinate system testing and assists users with acceptance testing to ensure product being delivered meets project requirements.
 - ☑ Design, develop and support technology solutions that integrate ancillary tools with core enterprise systems in order to enhance the value and services to clients.
 - ☑ Work with the various district systems engineers to maintain current, stable and highly available systems architecture.
 - ☑ Research and provide guidance on new technology solutions focusing on increasing the effectiveness and efficiency of our clients' business and educational processes.
 - ☑ Document work, including commenting code, preparing release notes, and updating end user documentation.
 - ☑ Write and document solution specifications.
- ☑ Use configuration management tools, such as source code repository to ensure that work is both integrated into overall solution and backed up.

Qualifications

Required Skills:

- ☑ Knowledge of the Systems Development Life Cycle (SDLC) and its
