## Field Network Technician – Junior Level

### Description

Key Requirements:

The ideal candidate must possess the following:

☑ Two years of experience administering a local area network/wide area network involving multiple remote locations. Possession of an industry recognized network-related certification may substitute for one year of the required experience.

☑ Note: Other combinations of applicable education, training, and experience that provide the knowledge and skills necessary to perform effectively in the position may be considered.

### Responsibilities

- Develops, operates and maintains various enterprise network systems.
- Works closely with vendors and other network technicians and system engineers to identify performance issues and schedule updates and patches.
- Analyzes and designs new and existing network enhancements.
- Works closely with users to define and document requirements.
- Reviews request to implement new or modify existing networks and determines whether request warrants a full assessment.
- Assembles an assessment team for developing a project assessment plan, if needed.
- Develops a needs assessment document identifying skills/resources required to successfully implement the project.
- Engages technical resources and assists technical and project management teams in the development of functional specification documents as necessary.
- Works with the Project Management Office as needed for project implementations.
- Writes and documents system specifications and configurations.
- Researches the use of new technologies.
- Coordinates network testing and assists users with acceptance testing to ensure product being delivered meets project requirements.
- Assists with the installation and maintenance of school system wide area network.
- Performs advance level troubleshooting of enterprise network systems.
- Performs detailed work involving servers, wireless, account creations/deletions/modifications, and system health.
- Works on multiple project requests. Engages vendors and advance level network technical resources to assist with best practice implementations and troubleshooting.
- Serves on committees and undertakes special projects as assigned.
- Works with vendors on service level agreements (SLAs) and compliance with these agreements.
- Assists the Network Services Supervisor with administrative responsibilities and organizational management as needed.
- Develops cost projections and assists in acquiring funds for project implementations.
- Provides input on the budget process as it relates to yearly network
